

RC2KPOL Rotating Feed Drive For RC1500 and RC2000 ACU

Features

- For use with feeds that use DC motor and potentiometer feedback
- Easily upgradable in the field
- Simple 5 wire interface
- Software programmable motion limits
- Precision voltage reference and 10-bit digitization for accurate positioning
- Polarization angle display
- Horizontal and Vertical control from satellite receiver
- ESD Protection
- For use with RC2000A and RC2000C controllers
- AC motor drive with RC2KINT drive interface box.
- Compatible with Seavey Engineering Single and Multi-Port 24V rotating feeds
- Available in 5, 12, 15, and 18 volt outputs
- 400mA output rating peaking at 800mA
