ANTENNA SYSTEMS

Viking Satcom is a leader in the commercial satellite antenna industry and offers a wide variety of antenna systems to accommodate any application. Sturdy construction and intuitive designs ensure that systems will provide years of reliable service, even in adverse conditions.

Earth Station Antennas

CPI Antenna Technologies provides a wide range of antenna systems for transmit/receive and receive only applications. The antennas feature high antenna efficiency and excellent rejection of noise and microwave interference. CPI Antenna Technologies' earth station antenna systems are available in a variety of sizes (3.8M to 16.4M) and frequency bands (C through Ka) to fit your application.

Receive Only Antennas

Receive Only Antennas are essential in the Broadcast and CATV industries. They are available in both motorized and fixed versions, fiberglass or metal reflectors, and offer a variety of other options. Viking Satcom also stocks all of the necessary equipment to complete TVRO systems.

- Offset Reflector Sizes: 1.0m, 1.2m, 1.8m, 2.4, and 3.8m
- Prime Focus Sizes: 1.8m, 2.4m, 3.0m, 3.7m, 3.8m, 4.2m, 4.5m, 5.0m, 6.3m, and 7.5m

Motorized Dual-Axis Antennas

Navigator Mounts provide extended motorized Azimuth and Elevation travel for both Transmit Receive and Receive Only systems. The innovative mount can also be used to upgrade non-motorized 1.8m and 2.4m CPI and Syware Global antennas in the field to motorized tracking systems. Navigator Mounts are built to withstand years of being in operation and are sturdy enough for Inclined-Orbit Tracking applications

- Transmit Receive Offset Reflector Sizes: 1.8m to 3.8m
- Receive Only Sizes: 1.8m to 7.5m

Transmit/Receive Antennas

Transmit and Receive VSAT Antenna systems are available in a wide variety of options. They can be used in C, Ku, X, and Ka Band, and can be packaged as singles or in bulk to suit individual needs. Transmit and Receive VSAT Antennas are designed for worldwide transmit and receive operation and are certified for use on Eutelsat, and other leading platforms. Additionally, the mounts are galvanized for coastal applications.

- Fixed and Motorized Configurations
- Sizes: 75cm, 98cm, 1.2m, 1.8m, 2.4m, 3.8m, and 4.5m

Quick-Deploy Antennas

Quick-Deploy Manual Antennas, designed for worldwide transmit and receive operation, can be easily transported and assembled within minutes. The lightweight, sectional reflector and tripod mount are packed in customized cases to facilitate safe travel over any kind of terrain. Soft, hard, or ruggedized cases are supplied according to reflector size. Custom tripod mounts are also available to accommodate various reflectors.

- Styles: Easy Transport, Backpack, and Tripod Styles
- Sizes: 1.0m, 1.2m, 1.8m, and 2.4m

High-wind Antennas

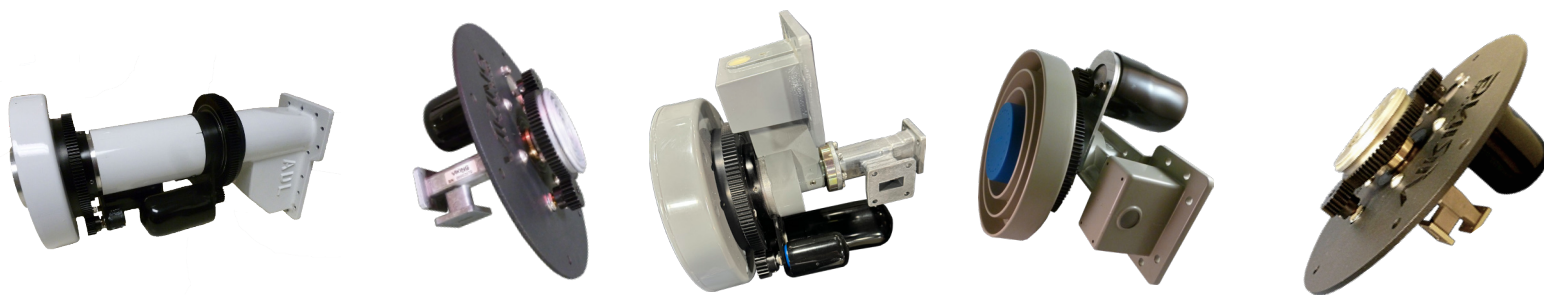

The CPI SAT high-wind antenna offers exceptional performance in windy conditions and locales. The 2194 series is capable of operating in either C or Ku-Band frequency ranges when configured accordingly. This antenna features a glass reinforced reflector for severe duty remote VSAT applications. It's also great for Coastal Areas with Heavy Salt Spray and extreme atmospheric conditions.

FEED SYSTEMS

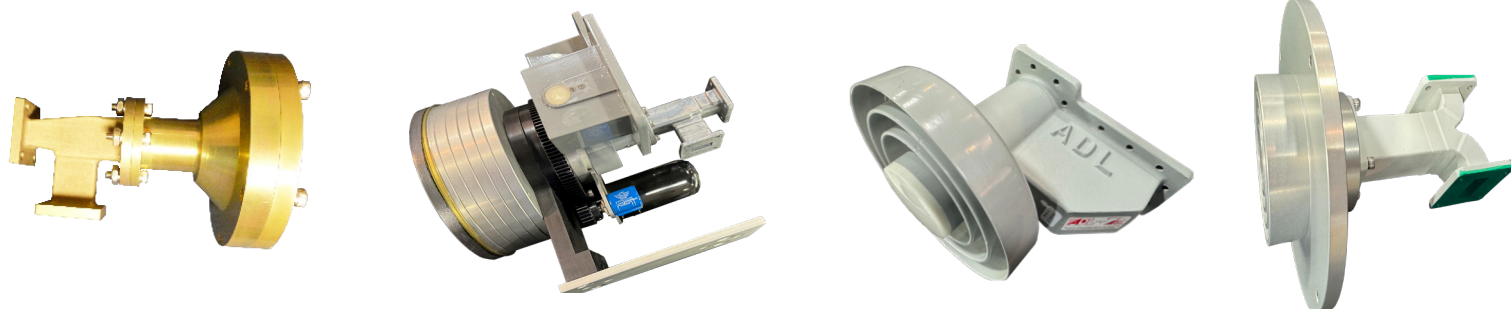

Viking Satcom manufactures and distributes a variety of Offset and Prime Focus feeds and is a leading supplier of C, Ku, Ka and X Band systems. These feeds are specifically designed to fit various antenna manufacturer platforms and can be customized to accommodate any system.

ABOUT US

At Viking Satcom, our priority is to deliver exceptional service to our customers and provide them with an extensive line of high quality products at competitive prices.

Viking Satcom is at the forefront of innovation and technology and a leader in the commercial satellite antenna industry. We offer a wide selection of satellite communication products ranging from antennas to their related RF components. Our team has years of experience both in the industry and in the field to bring you the highest level of product knowledge and customer service available.

Contact a member of our team to learn more about our products and to find out what we can do for you and your business.

Viking Satcom is an Exclusive Distributor of Communications & Power Industries.
