

The RC2000 Web Server provides operators the ability to control their RC2000 controller via their PC, eliminating any requirements for serial ports or long serial connections.

Features

- ◆ Serves the RC2000 front panel via TCP/IP. Just point your browser at the fully configurable IP address.
- ◆ Allows full functionality of the RC2000, including setup and fault clearing
- ◆ Operates on 12VDC or universal AC adapter (supplied)
- ◆ Compatible with RC2000A version 2.70 and up, as well as with tracking RC2000X version 1.70 and up
- ◆ Small 4.25" x 3.5" footprint mounts easily on standard rack holes behind your RC2000
- ◆ Uses Java™ for responsiveness
